Multiple Codeblocks

1.1   Using pandas

Let's import pandas:

```python
1  import pandas as pd
```

We can create a **dataframe** like this:

```python
1  df = pd.DataFrame(data={"Animal": ["Cat", "Dog"],
2                          "Name": ["Zoya", "Hash"]})
```

```python
1  "A veeeeeeeeeeeeeerrrrrrrrrrrrrrrrrrrrrryyyyyyyyyyy
↪     loooooooooooooooooooooooooooooooooooonnnnnnnnnng
↪     liiiiiiiiiiiinnnnneeeeeeeeeeee "
```

```
1  pip install .
```

That's it!
